# FURUNO

RADAR

Excellent target detection Improved user interface

▶ **High performance Radar with Cat.2 (500-10,000GT) and Cat.3 (<500GT) support**

▶ **Automatic Clutter Elimination (ACE) function quickly adjusts the radar image with a single button press**

▶ **Accurately tracks other vessels with advanced Target Tracking function for collision avoidance**

▶ **Improved sea and rain clutter suppression function**

▶ **Newly designed user interface for simple and efficient operation**

Fast Target Tracking™

It only takes a few seconds after a target has been selected, that a speed and course vector is displayed. With accurate tracking information, estimation of other vessels' course and speed is made easier.

Before selecting a target

Within a few seconds

Speed and course vector

Easy to operate control unit

Rotate to adjust rain reflection, sea surface reflection, gain

Touchpad area

Rotokey and frequently used key

Simple and efficient operation is made possible with individual knobs for setting gain/rain/sea clutter suppression, as well as a RotoKey and touchpad.
