NAVTEX system operation

The world is divided into 16 areas (called Navareas) as shown at right.
Each Navarea has multiple NAVTEX stations and each NAVTEX station has an identification code, from "A" to "Z."
The service range of a NAVTEX station is typically 200-400 nautical miles depending on the terrain and station transmit power. A NAVTEX station normally broadcasts every four hours.
There are two channels including international channel, 518 kHz, and local channels, 490 and 4209.5 kHz. International channels broadcast messages in English. On local channels, 490 kHz, is available in the UK, France, etc., using their own languages. 4209.5 kHz is allocated for NAVTEX broadcasts in tropical areas - not widely used at the moment.

SPECIFICATIONS

NAVTEX RECEIVER
Receiving Frequency — 518 kHz and 490 or 4209.5 kHz
Mode of Reception — F1B
Sensitivity — 2 μV e.m.f. (50 ohms), 4% error rate
Input Protection — Withstands 30 Vrms for 15 min or more (w/ preamp unit)
Spurious Emission — 1 nW or less
Message Category —
- A : Navigation warning
- B : Meteorological warning
- C : Ice report
- D : Search and rescue information/ piracy and armed robbery
- E : Meteorological forecast
- F : Pilot message
- G : AIS
- H : Loran-C message
- I : reserved presently not used
- J : SATNAV message
- K : Other electronic navigational aid and system message
- L : Navigational warning (additional)
- M to Y: Reserved - presently not used
- V : Notice to Fishermen (US only)
- Z : QRU (no message on hand)

DISPLAY
Screen Size — 5" monochrome LCD, 76 x 100 mm
Resolution — 240(H) x 320(V)
Display Modes — Message, List, NAV Data
ID Storage — 200 x 2 channels
Message Storage — 200 messages x 2 channels (100,000 characters x 2 channels)

PRINTER SECTION (for NX-700A)
Printing System — Line thermal head printing system
Printing Paper — Thermal paper (58 mm x 30 m)
Printing Width — 48 mm
Character Format — 24 x 12 dot
Dot Pitch — 8 dots/mm
Number of Characters — 32 characters/line
Print Speed — 20 mm/sec.

ANTENNA UNIT
Antenna Type — NX-7H: H-field antenna with preamp
Output Impedance — 50 ohms
Power Supply — +8 V to +9 V (thru co-ax cable)

INTERFACE
Input — IEC61162-1/-2 navigational data from INS, GPS
GGA, GLL, RMC, ZDA, ACK, GNS, VHW, VTG, VBW, NRM, CRQ
VHW, VTG, ZDA
Output — IEC61162-1/-2 message data for INS, PC
NRX, ALR, NRM
Alarm — Normal close, contact closure signal(floating, max 80mA, 50V)
Printer — RS-232C(NX-700B only)

POWER SUPPLY
NX-700A: — 12-24 VDC, 1.5-0.8 A
NX-700B: — 12-24 VDC, 0.7-0.4 A

ENVIRONMENT(fully complied with IEC 60945 3rd/4th ed.)
Temperature
Antenna Unit: — -25°C to +70°C(-13°F to +158°F)
Receiver, Display Unit: -15°C to +55°C(5°F to +131°F)
Waterproofing
Antenna Unit: — IP66
Receiver Unit: — IP20
Display Unit:
NX-700A — IP20
NX-700B — IP25(front panel)

EQUIPMENT LIST
Standard
1. Receiver Unit NX-7001 — 1 unit
2. Antenna Unit NX-7H — 1 unit
3. Display Unit with Bracket (Specify when ordering) — 1 unit
   NX-700A: Display with Printer, NX-700B: Display only
4. Installation Materials and Spare Parts — 1 set

Option
1. Antenna Mounting Base
   Pipe mount: CP20-01111
   Deck mount: 13-QA330
   Handrail mount 13-RC5160
   Offset bracket: 13-QA310
2. Cable for Antenna
   3D2V,10/20/30/40/50 m;
   RG10U, 30/40/50 m
3. Cable for Display Unit
4. Flush Mount Kit for Display Unit
   for NX-700A: OP08-19
   for NX-700B: OP08-20
5. Power Supply Unit PR-240-CE
6. Thermal Paper for NX-700A

NAVTEX
Dual-channel NAVTEX Receiver

Enhances the navigation efficiency and safety by watching NAVTEX messages broadcasted on both international and local channels

FURUNO NX-700 is a dual-channel NAVTEX receiver for SOLAS ships complying with the new NAVTEX performance standard MSC.148(77).

The NX-700 can receives two channels simultaneously. One is set for 518 kHz to receive international NAVTEX messages and another is selectable from 490 or 4209.5 kHz for domestic or local NAVTEX messages. These messages include a variety of safety information such as Navigational Warnings, Meteorological Warnings, Search and Rescue (SAR) information and other information for ships sailing within the reach of each service station's coverage. The broadcast station can be selected automatically according to own ship position when the NX-700 is connected with GPS or EPFS.

Every incoming message is stored in non-volatile memory and is displayed on the clear 5" silver bright LCD. Three different font sizes are available and one of them can be selected on menu.

The NX-700A consists of a receiver, display with printer and antenna units. The NX-700B has a low profile, stylish display without a printer, receiver and antenna units. The compact umbrella type antenna requires no grounding because it is H-field antenna. In addition, the antenna incorporates a high-performance preamp within the compact body, which gives reliable and uninterrupted reception without an extra whip antenna.

Receiver Unit

Dual-channel NAVTEX Receiver
NX-700A/B

▶ **Fully meets new IMO resolution MSC.148(77), IEC 61097-6 Ed.2**
- Dual channel reception, 518 kHz and either 490 or 4209.5 kHz, simultaneously
- Incorporates a printing device(NX-700A) or a dedicated display device with printer output(NX-700B)
- 200 message of average length 500 characters can be stored in non-volatile memory

▶ **Incorporates a preamp within a lightweight, compact antenna for reliable, uninterrupted reception**

▶ **Display messages on a clear 5" silver bright LCD**

▶ **Low power consumption**

▶ **NAV data display acts as NMEA repeater for GPS or instruments**

Operators can print out important messages by pressing a dedicated "PRINT" button.

Message inbox

Status icons
Message icons

All received messages with a selected channel information are sorted by order of time in the message inbox. Operators can easily know the status of each message from the message ID and icons. When receiving SAR information, NX-700 notifies of the incoming messages by audible alarm. For quick viewing, operators can pick up messages they are interested in and display them by using the sort function.

NavData window
Essential navigational data is clearly displayed at the bottom of display when connected with a positioning equipment.

Guide for key controls

Message display

Distance window
Shows distance from own ship to a position of event, which is mentioned in message. This enables swift understanding of whether the position is nearby own ship or not.
