DISCOVER A NEW WORLD WITH THE LATEST INNOVATION FROM WASSP

Outstanding performance, versatility and value. That's what you expect and exactly what you get with the new **F3** sonar from WASSP.

This next generation multibeam sonar has been redesigned from the ground up around a new fully digital DRX transceiver. It delivers on every front – accurate, versatile, user-friendly and most importantly, scalable to your exact needs.

The only thing that hasn't changed with the **F3** is our commitment to bring you a multibeam sonar at a cost-effective price.

MULTIBEAM SONAR

- ▶ **New all-in-one digital DRX transceiver**
Incredibly versatile and ready for the next technology advances
- ▶ **Wideband fully digital** 136 - 184kHz transducer technology
- ▶ **Choose your own functions** with new licensing options
- ▶ **Cost-effective solution** for multiple applications
- ▶ **Wireless capability** with optional licence
- ▶ **Easy to install/commission**
- ▶ **Turnkey solution offered** with position/heading and motion sensors
- ▶ **CDX** – Simplified user interface
- ▶ **TimeZero compatible** with optional licence

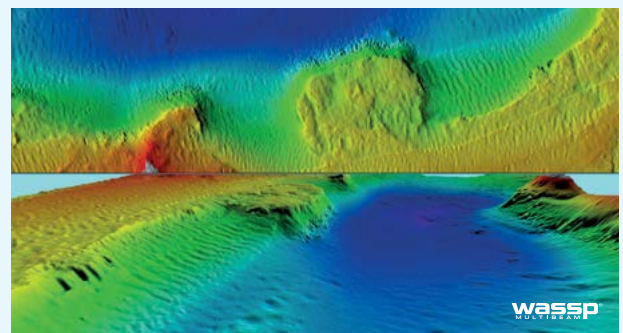

Multibeam Transducer

GENERATE YOUR OWN PERSONAL MULTIBEAM CHART

The **F3** is set to revolutionise inshore fisheries with its Wideband CHIRP technology.

Scanning a 120 degrees swath port to starboard and using 224 beams, the **F3** delivers each and every time. By using advanced signal processing, you get a complete picture of seafloor bathymetry with ease.

DRX MULTIBEAM HARDWARE FOR THE FUTURE

This innovative all-in-one “black-box” is not just a robust hardware platform but also introduces **cutting-edge technical innovations and incredible versatility for finding your catch**. This opens countless new possibilities for your operations.

- ▶ Dimensions (L x W x H): 377 x 260 x 132mm
- ▶ Power supply: 9-32VDC

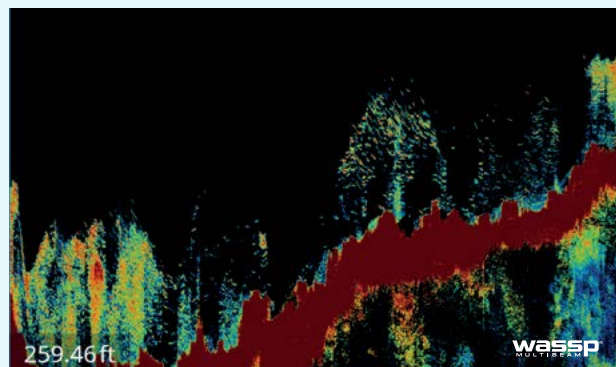

DRX

NEW EASY-TO-USE INTERFACE

The **F3** introduces a new simplified WASSP CDX for control, visualisation and data management while still providing a comprehensive set of functions to meet the most demanding fishing requirements.

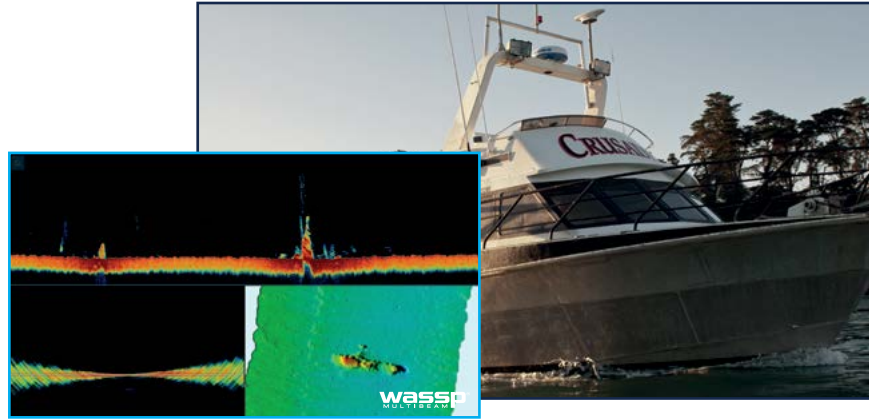

UNPRECEDENTED CLARITY

INSHORE FISHING

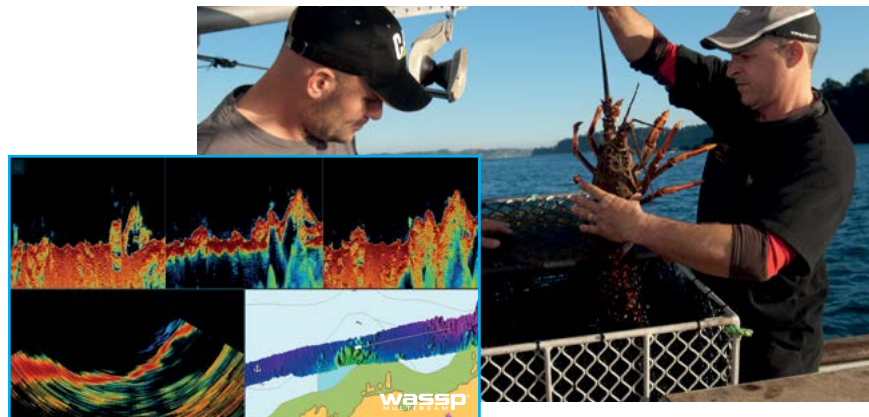

The scalable system has a wide range of features and capabilities; all manner of inshore fishing types can be optimised, ensuring efficiency and increased productivity in all fishing methods employed.

The system can be tailored for all types of inshore fisheries.

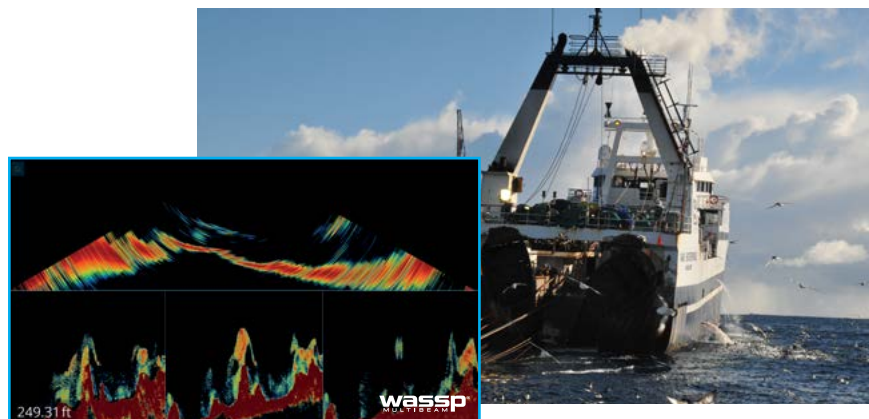

POTTING

The 3D presentation of the seabed, coupled with the optional backscatter function, to aid in the assessment of seafloor hardness, ensures the best location of pots in a range of environments.

TRAWLER

With accurate water column and seabed information at hand, skippers are better informed, and can make decisions ensuring they maximise their catch while minimising time at sea.

SPORTSFISHING

With its 120° swath, baitfish shoals can be located quickly, allowing the presentation of lures and baits to marauding billfish and tuna. The wide band CHIRP technology employed provides amazing target separation of target species throughout the full water column.
